**Imaging**

EXAM: Bone mineral density examination

HISTORY: Postmenopausal female.

DXA BMD was done at Missouri Baptist Breast Health Care Center on Hologic Horizon W.

Precision testing at this site is not yet available.

BMD L1-L4 is 0.662 g/sq cm corresponding to a T score of -3.5.

BMD left femoral neck is 0.467 g/sq cm corresponding to a T score of -3.4.

BMD total left hip is 0.612 g/sq cm corresponding to a T score of -2.7.

The 10-year fracture risk for major osteoporotic fracture: Not calculated.

The 10-year fracture risk for hip fracture: Not calculated.

COMPARISON: Comparison with the prior study is not entirely valid as it was done on a completely different machine.
