TECHNIQUE:

AP and lateral views of the thoracolumbar spine shows no compression deformity nor subluxation. The disc spaces are normal height.

FINDINGS:

The bone density of the lumbar spine has an overall T-score of -1.5 with a range of -1.2 through -1.9. This represents mild to moderate osteopenia. The bone mineral density of the left hip has an overall T-score of -1.3 with a value of the left femoral neck of -1.7. This represents moderate osteopenia.

IMPRESSION:

1. Moderate osteopenia.
