## COMMENTS:

The technical quality of the study is satisfactory. There is a history of prior fragility fracture.

The study was done on Hologic Discovery A (S/N 85612).

The data is available on PACS.

## DIAGNOSTIC CATEGORY:

The BMD fulfills the WHO classification for OSTEOPOROSIS.

## ABSOLUTE FRACTURE RISK CATEGORY:

Based on age and BMD, this patient's 10 year fracture risk is HIGH (>20%).
