

DEXA

DXA Bone Densitometry Report: 20 November 2019

Dear [REDACTED]

Your patient Geraldine Hayes completed a BMD DEXA test on 20/11/2019. The following summarizes the results of our evaluation.

PATIENT DETAILS:

Name:	Hayes, Geraldine	Birth Date:	[REDACTED]	Height:	[REDACTED]
Patient ID:	[REDACTED]	Exam Date:	20/11/2019	Weight:	[REDACTED]
Gender:	[REDACTED]	Fractures:		Treatments:	Algaecal
Indications:	Family Hist. (Parent hip fracture), Family hx of Osteoporosis, History of Fracture (Adult), Osteoporosis				

ASSESSMENT:

The BMD measured at AP Spine L2-L4 (L3) is 0.680 g/cm² with a T-score of -4.3. This patient is considered osteoporotic according to World Health Organization (WHO) criteria. Fracture risk is high. Pharmacological treatment, if not already prescribed, should be started. A follow up bone density test is recommended in one year to monitor response to therapy.

With a Z-Score of -3.0, this patient has very low BMD for their age and sex. Causes of secondary bone loss should be investigated.

AP Spine: L2-L4 (L3) (BMD)
BMD (g/cm²) YA T-score

T-score: USA (Combined NHANES/Lunar)
Z-score: UK

Site	Region	Measured Date	Measured Age	WHO Classification	Young Adult T-score	BMD
AP Spine	L2-L4 (L3)	20/11/2019	61.6	Osteoporosis	-4.3	0.680 g/cm ²

World Health Organization (WHO) criteria for post-menopausal, Caucasian Women:

Normal: T-score at or above -1 SD
Osteopenia: T-score between -1 and -2.5 SD
Osteoporosis: T-score at or below -2.5 SD

RECOMMENDATIONS:

Treatment options should be discussed with patients diagnosed with osteoporosis. All patients should ensure an adequate intake of dietary calcium and vitamin D.

FOLLOW-UP:

People with diagnosed cases of osteoporosis or at high risk for fracture should have regular bone mineral density tests.

Follow up DEXA is recommended in 1 year.
