

Frye Regional Medical Center

Patient Name: HENNIS, JANE

Encounter Type: 2 - Outpatient

DOB/Age/Sex: Female

Date of Service: 6/21/2018

MRN:

Location: FRM-FC

Acct #:

Bone Density

Accession #:

Exam Date/Time:
6/21/2018 09:54 EDT

Procedure:
BD DEXA Axial Skeleton

Report

BONE DENSITY DEXA SCAN 6/21/2018

History: Follow-up abnormal bone density.

Comparison: 6/20/2016, 6/19/2014.

Findings:

Anterior L2-L4 region bone mineral density is 0.980 g/sq cm, T score -1.6 (previously 0.945, an increase of 3.7%).

Left femoral neck BMD is 0.713 g/sq cm, T score -2.3 (previously 0.695, an increase of 2.6%).

IMPRESSION:

1. Moderate osteopenia, 4 times increased risk of fracture. Bone density has increased since 2016.
