EXAM DATE: March 30, 2017

NAME: **VAN HAVERBEKE, JANICE**

**BONE MINERAL DENSITOMETRY:**

Clinical History: No history of corticosteroid use or fragility fracture.

Limitations of Study: None

LUMBAR SPINE (L1-L4)

BMD g/cm/sq: 0.867

T-score: -2.6

FEMORAL NECK

BMD g/cm/sq: 0.707

T-score: -2.3

TOTAL HIP

BMD g/cm/sq: 0.706

T-score: -2.4

DIAGNOSTIC CATEGORY: Osteoporosis

TEN YEAR FRACTURE RISK: Moderate (10 to 20 percent)

FOLLOW-UP RECOMMENDATIONS: Treatment recommended with repeat bone mineral densitometry in 1 to 2 years.

>= 50 years of age

Severe Osteoporosis: T-score <= -2.5 with fragility fracture

Osteoporosis: T-score <= -2.5

Low Bone mass: T-score <-1.0 and >-2.5

Normal: T-score >= -1.0
