LYNN HANNAH  
[REDACTED]

Dear LYNN,

Osteopenia only - continue current treatment no changes are needed

**\* Final Report \***

**Reason For Exam**

Other specified disorders of bone density and structure, multiple sites; osteopenia

**FINAL**

EXAMINATION: MM Bone Densitometry DEXA Scan 2/23/2021 3:54 PM

CLINICAL INDICATION: Other specified disorders of bone density and structure, multiple sites; osteopenia

COMPARISON: 12/12/2018

**TECHNIQUE:** The lumbar spine and both proximal femora were scanned with the Lunar DEXA system. Please see attached printed scanner output for regional density readings located in Prisma Health Powerchart. If you do not have access to Prisma Health Powerchart these will be mailed to your office.

**COMMENTS:**

1. Normal bone mineral density in the lumbar spine with total T-score of 1.1, previously 1.3.
2. Osteopenia in the left femoral neck with T-score of -2.1, previously -2.2.
3. Osteopenia in the right femoral neck with T-score of -2.1, previously -2.3.

**NOTE:** The T-Score reflects the standard deviation of this patient's readings from those of normal young adult controls.
