

patient: Hrabchak, Sheila

Diag. Imaging#: [REDACTED]

status:

Referring Physician: [REDACTED]

PC Physician:

XAM [REDACTED] 06/17/2020 9:14 AM -BD BONE DENSITY (SCREENING)

INDICATION: [REDACTED] white female with history of osteoporosis.

COMPARISON: 9/3/2019

TECHNIQUE: Bone mineral density of the lumbar spine and left hip was evaluated. The exam was performed on a GE healthcare machine.

FINDINGS:

LUMBAR SPINE (L1-L4):

BMD: 0.935 g/cm², previous 0.879, 6% increase since prior exam

T-Score: -2.0

LEFT FEMORAL NECK:

BMD: 0.739 g/cm², previous 0.733, no change since prior exam

Patient: Hrabchak, Sheila [REDACTED]

Diag. Imaging#: [REDACTED]

Status:

Referring Physician: [REDACTED]

CC Physician:

EXAM [REDACTED] 06/17/2020 9:14 AM -BD BONE DENSITY (SCREENING)

T-Score: -2.1

LEFT TOTAL HIP:

BMD: 0.698 g/cm², previous 0.674, 4% increase since prior exam

T-Score: -2.5

IMPRESSION:

This patient's bone mineral density is in the range of osteoporosis left total hip.

RELATED INFORMATION:

1. The T-score is relative to peak bone mass in early adulthood, while the Z-score is relative to individuals of the same age and sex.
