Bone Density Study

Patient: COLLEEN
LUKOTCH

DOB: [REDACTED]

READ

HISTORY: Osteoporosis.

FINDINGS: Bone densitometry of the lumbar spine and both hips was performed. Lumbar spine BMD value is 0.922, with a T score of -2.2. This is unchanged compared to the prior study from 7/20/2016 and remains osteopenic. Left femoral neck BMD value is 0.638, with a T score of -2.8. This is not significantly changed compared to the prior study and remains osteoporotic. Right femoral neck BMD value is 0.579, with a T score of -3.3. This is significantly decreased by 6.3% compared to the prior study, remaining osteoporotic.

IMPRESSION: Significant interval decrease in right femoral neck bone density.
