### READ

EXAM: Bone Density Study

Indication: Osteoporosis screening

Description: Exam is compared to prior study of 2018.

Bone densitometry was performed of the lumbar spine and proximal bilateral femurs:

Lumbar spine L1-L4: BMD 1.1; T-score -1.1. Percent change 50% which is significant

Left femoral neck: BMD 0.6; T-score -2.9. Percent change 0.3%;  
Proximal left femur total : BMD 0.7; T-score -2.4. Percent change 4%

Right femoral neck: BMD 0.6; T-score -2.9. Percent change 10% which is significant;  
Proximal Right femur total : BMD 0.7; T-score -2.6.  
Percent change 6% which is significant

Impression: Osteoporosis. Fracture risk is moderate.
