General information

Ordered by: Anna Cosyleon, MD

Collected: 02/15/2021 9:21 AM

Resulted: 02/16/2021 8:30 AM

Result status: Final result

More of your health information may be available to you and anyone who has permission to access your health record on kp.org. You may even see detailed test results before your care team has had a chance to review them and contact you about them. Some test results or notes may be difficult to interpret on your own. We recommend allowing your care team time to contact you regarding follow-up, however if you are unable to wait for them to reach out you may contact your care team if you have any concerns. If these tests were ordered by a network provider, please call the doctor's office directly. If you are receiving care from a case management program, please contact the program directly.
