## Neck

T-score vs. White Female. Source:BMDCS/NHANES White Female. Z-score vs. White Female. Source:BMDCS/NHANES White Female.

## 10-year Fracture Risk<sup>1</sup>

Major Osteoporotic Fracture 11%

Hip Fracture 1.5%

Reported Risk Factors:

US (Caucasian), T-score(WHO)=-2.0, BMI=25.7, rheumatoid arthritis

<sup>1</sup> FRAX® Version 3.08. Fracture probability calculated for an untreated patient. Fracture probability may be lower if the patient has received treatment.

## Comment:

All treatment decisions require clinical judgment and consideration of individual patient factors, including patient preferences, comorbidities, previous drug use and risk factors not captured in the FRAX model (e.g. frailty, falls, vitamin D deficiency, increased bone turnover, interval significant decline in BMD).
