

Patient Name: Sundstrom, Wendy [REDACTED]
Date of Birth: [REDACTED]
Phone Number: [REDACTED]
Service Date: 13 Feb 2018
Referring Doctor: Dr. Laurie Nadolny [REDACTED]

BMD

CLINICAL INDICATION: Follow-up from 2015 report. Patient had been advised to take [REDACTED] but refused.

FINDINGS: The lumbar spine at L1-L4 is -3.0.
T score in the femur neck is -2.1.
T score in the total hip is -1.8.

IMPRESSION: The lowest T score of -3.0 would be suggestive of osteoporosis as before. 10 year fracture risk is considered high.

Refer to Canadian Osteoporosis guidelines for more accurate assessment of fracture risk, and monitoring and management and follow-up as clinically needed.
